

## **Shot Scope H4 - Information**

**Product name:** Shot Scope H4

**Subtitle:** GPS Handheld with Performance Tracking

**RRP:** \$149.99 USD, \$199.99 CAD, £149.99 GBP, €179.99 EUR

### **Product Description:**

The Shot Scope H4 is a powerful GPS handheld that tracks every shot and provides over 100 performance insights to help any golfer improve. Preloaded with 36,000+ courses, the H4 can be used worldwide on any golf course with no subscription or additional costs. The H4 offers a golfer maximum flexibility for shot tracking on-course. The H4 can be fastened to a belt with the supplied metal clip, attach it to a golf bag with the included carabiner, or use the strong magnet to secure it to a golf cart. The H4 provides golfers with accurate front, middle and back distances to greens and hazards, as well as layup distances, all available in yards or meters. Every shot can be tracked using the 16 tracking tags provided, which screw into the end of each club. Using either the Shot Scope mobile app or web dashboard, analyse over 100 performance statistics, including Strokes Gained, and take your game to the next level.

### **Key Features:**
